ABOUT

Offensive Security Researcher specializing in Red Teaming, Threat Intelligence, Malware Analysis, and Incident Response. Secured 25+ platforms, discovered multiple high-impact vulnerabilities, and contributed 1500+ CVE analyses. Expert in Python automation, mass exploitation tooling, and vulnerability research.

EXPERIENCE

Independent Security Researcher

2023-01 – Present

Offensive Security Researcher

- Secured 25+ government and private platforms, identifying 5 RCE, 10 SQLi, and 10 Information Disclosure vulnerabilities.
- Developed RSCHunter, a mass scanning and exploitation toolkit for RSC vulnerabilities (CVE-2025-55182).
- Helped organizations mitigate React2Shell exploitation
- Built automated reconnaissance and exploitation tools improving assessment speed and consistency.
- Published research, CTF writeups, and technical content demonstrating offensive methodologies.

LoginSoft

2024-02 – 2025-07

Security Researcher

- Reviewed 1,500+ open-source CVEs across major ecosystems including Python, Go, Java, JavaScript, Ruby, PHP, C, C++, .NET.
- Correlated CVE and non-CVE findings using proprietary tools, improving dataset accuracy for enterprise SCA customers.
- Performed daily static code reviews to validate vulnerable code paths missed by automated scanners.
- Tracked vulnerable package versions and dependency chains, helping clients identify high-risk libraries.
- Built Python scripts that reduced analysis time by ~25% and improved workflow efficiency.

Wipro

2019-11 – 2021-12

Senior Associate

- Achieved 95% issue resolution rate across 1,000+ cases while meeting strict KPIs.
- Mentored 18+ team members and ranked Top 3 for performance in the process.

KEY PROJECTS

RSCHunter ↗

Mass RSC vulnerability scanner and exploitation toolkit (CVE-2025-55182).

ReconFavicon ↗

OSINT fingerprinting using favicon hashing.

FFUF Contribution ↗

Improved stability and behavior (PR #869).

Nmap XML Visualizer ↗

Browser-based Nmap XML visualization tool.
